ATTENTION

As you know the After School Program (ASP) is a pre-paid program, which means before your child attends the program it must already be paid for. It is also the parents' responsibility to keep up with the weekly payments. However, we have quite a number of parents with delinquent accounts and we have made every effort to send home an account balance at the end of every month. If your child has a negative balance they will not be allowed to attend the program and you

will be contacted to provide alternate transportation. If transportation is not available your child will be checked into ASP but will not be allowed to participate in any grade level activities. They will receive a snack and you will be charged for the day.

Fun Friday

The past couple of weeks the students have truly enjoyed fun Friday as we have a Wii system and "Just Dance" is a big hit. The students have been dancing to their hearts delight. We also have

basketball games in the gym, and the students are also given the opportunity to go to the computer lab.

Homework

We provide time for homework for grades 2-5 daily and we encourage each student to have an AR book to read during ASP.

Asp Blog

Please take the time to subscribe to the ASP blog, where you can get updates about what is happening in ASP. You can do so by clicking on the ASP link on the school's web site.
