

EQ: How can I change an improper fraction into a mixed number?

You can change an improper fraction into a mixed number by dividing the numerator by the denominator. The quotient is the whole number. The divisor becomes the denominator, and the remainder becomes the numerator.

ex. $\frac{25}{4}$

$1 + \frac{1}{4}$

$= 6 \frac{1}{4}$

denominator 4

$$\begin{array}{r} 6 \text{ whole} \\ 4 \overline{)25} \\ \underline{24} \\ 1 \text{ numerator} \end{array} = 6 \frac{1}{4}$$
